THE HANDS

OUR MOST IMPORTANT TOOLS

NITRAS - HAND / ARM PROTECTION

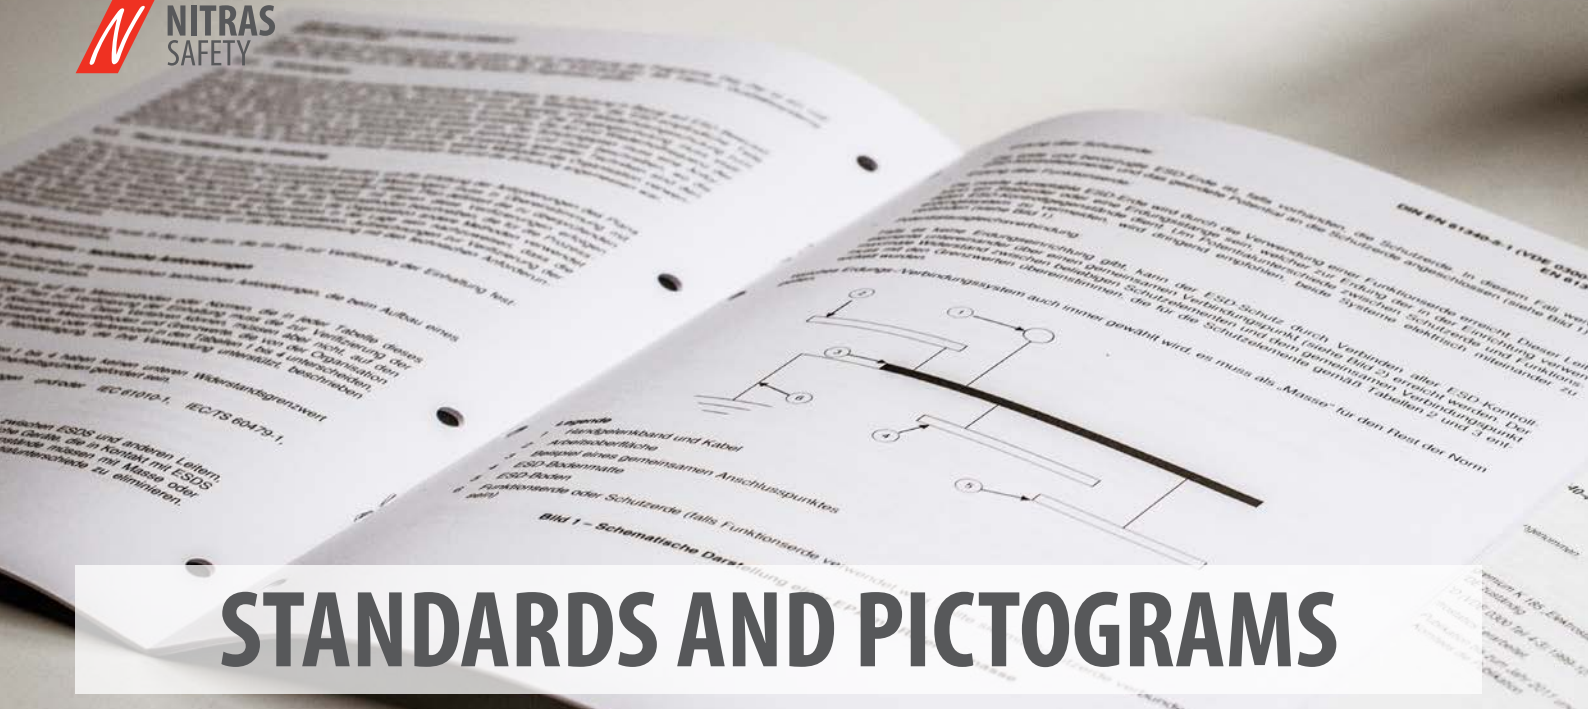

Our hands are true multifunctional tools. Whether rough work or most precisely activities: thanks to them, we can adapt to any situation and cope with it. In combination with an extremely flexible wrist, our hands have become what they are today: our most important tool.

Accordingly it is important to protect this perfect interplay of muscles, bones, nerves and tendons appropriate for the situation. Because our hands are at the forefront of almost all activities and therefore require increased attention. NITRAS has more than 35 years of experience in hand protection and this know-how leads to our protective gloves: selected materials, perfect wearing comfort, excellent fit as well as protective functions adapted to the situation. We know what it takes to optimally protect your hands during every activity. Don't let anything stop you - go to it!

STANDARDS AND PICTOGRAMS

All performance levels, pictograms and information specified in this catalogue comply with the state as of September 2023. These are subject to change during the validity of this catalogue. Please contact us for any queries or current information. All information is subject to change.

General explanations of achieved performance levels (all tests were carried out under laboratory conditions):

- 1-6 / A-F Achieved test result (the higher, the better)
- 0 Minimum performance level not achieved
- X Not tested or not applicable due to the material or design

EN 420 / EN ISO 21420

Protective gloves - General requirements and test methods

This standard defines the general requirements and relevant test procedures for glove design and construction, resistance of glove materials to water penetration, innocuousness, comfort and efficiency, marking and information supplied by the manufacturer applicable to all protective gloves.

EN 388

ABCDE

Protective gloves against mechanical risks

Requirements, test methods, marking and manufacturer's information for protective gloves against the mechanical risks of abrasion, cut, tear, puncture and, where applicable, impact.

Test parameter	Performance level
A Abrasion resistance	1-4
B Blade cut resistance (Coupe)	1-5
C Tear resistance	1-4
D Puncture resistance	1-4
E Blade cut resistance (TDM)	A-F

EN ISO 374-1

ABCDEF

Protective gloves against chemicals and micro-organisms

Requirements for protective gloves designed to protect the user against hazardous chemicals and microorganisms:

- Type A: at least six test chemicals (protection index at least class 2 each)
- Type B: at least three test chemicals (protection index at least class 2 each)
- Type C: at least one test chemical (protection index at least class 1)

Test parameter	Classes
A-F Code letter for test chemicals	1-6

Code letter	Test chemical	Code letter	Test chemical
A	Methanol	J	n-Heptane
B	Acetone	K	Sodium hydroxide 40%
C	Acetonitrile	L	Sulphuric acid 96%
D	Dichloromethane	M	Nitric acid 65%
E	Carbone disulphide	N	Acetic acid 99%
F	Toluene	O	Ammonium hydroxide 25%
G	Diethylamine	P	Hydrogen peroxide 30%
H	Tetrahydrofurane	S	Fluoric acid 40%
I	Ethyl acetate	T	Formaldehyde 37%
Breakthrough time (minutes)	Protection index	Breakthrough time (minutes)	Protection index
> 10	Class 1	> 120	Class 4
> 30	Class 2	> 240	Class 5
> 60	Class 3	> 480	Class 6

EN ISO 374-5

Protective gloves against dangerous chemicals and micro-organisms

VIRUS

Requirements for protective gloves designed to protect the user against hazardous chemicals and microorganisms.

Addition underneath the pictograms	Protection against
No addition	Bacteria, fungi
VIRUS	Bacteria, fungi, viruses

EN 511

Protective gloves against cold

ABC

Requirements and test methods for protective gloves against convective cold or contact cold till -50°C. The cold may be related to climatic conditions or to occupations.

Test parameter	Performance level
A Convective cold	1-4
B Contact cold	1-4
C Waterproofness	1

EN 407

Protective gloves against thermal risks

ABCDEF

Protective gloves against heat and / or fire and its identification.

ABCDEF

Test parameter	Performance level
A Resistance to flammability	1-4
B Contact heat resistance	1-4
C Convective heat resistance	1-4
D Radiant heat resistance	1-4
E Resistance to small splashes of molten metal	1-4
F Resistance to large quantities of molten metal	1-4

EN 12477

Protective gloves for welders

ABCDEF

Essential requirements and test methods for protective gloves for manual welding, cutting and related processes.

Type A: low dexterity (with high other requirements)

Type B: high dexterity (with low other requirements)

	Test parameter	Performance level
A	Resistance to flammability	1-4
B	Contact heat resistance	1-4
C	Convective heat resistance	1-4
D	Radiant heat resistance	1-4
E	Resistance to small splashes of molten metal	1-4
F	Resistance to large quantities of molten metal	1-4

EN 16350

Protective gloves - Electrostatic properties

Additional requirements for protective gloves worn in areas where flammable or explosive atmospheres exist or may exist (see IEC 60079-32-1). It specifies a test method and requirements for performance, labelling and information on electrostatic dissipative protective gloves to minimise the risk of explosion. Antistatic protective gloves dissipate electrostatic charges in a controlled manner and ensure that electrostatic charging of the wearer is avoided. The wearer must be grounded accordingly. This requires the use of appropriate protective gloves, protective clothing, safety shoes and floor coverings.

EN 455

Medical gloves for single use

Requirements and testing for freedom from holes, physical properties, biological evaluation and shelf life determination of medical gloves for single use.

DIN SPEC 91365

Needle puncture testing

Test method for the determination of the puncture resistance against medical needles for materials and products.

TAEKI

This pictogram indicates, that protective gloves and arm protectors are made of the premium and innovative special yarn TAEKI. This yarn is refined with a special fibre which is characterised by a very high mechanical resistance and even withstands situations with heat. Due to these characteristics this fibre is preferentially used by manufacturers from various industries (e.g. automotive sector, aeronautics) to produce durable and high-performance products.

KYORENE®

The high-quality special yarn from KYORENE® ensures a perfect wearing comfort and has also an additional protection against contact heat.

ERGO GLOVES

Protective gloves, which are certified according to ERGO GLOVES, are characterised by excellent ergonomic properties. The certification includes testing and evaluation of dexterity, wearing comfort, fit and microclimate (temperature in the glove and breathability).

Vegetable tanned leather

Marks gloves, whose leather is vegetable tanned.

KATA 5

This pictogram indicates, that protective gloves are manufactured with the special yarn KATA 5. This yarn made of two high-quality and durable materials. It is characterised by its highest wearing comfort, highest dexterity and very high cut resistance. Further this innovative special yarn has an additional protection against contact heat.

Powdered

This pictogram indicates, that the related disposable gloves are powdered.

Powder-free

This pictogram indicates, that the related disposable gloves are powder-free.

Gauge

7 Gauge knit of gloves (coarse knit)

10 Gauge knit of gloves (average knit)

13 Gauge knit of gloves (fine knit)

15 Gauge knit of gloves (finest knit)

18 Gauge knit of gloves (finest knit +)

For food contact

Products and items which are determined to come into contact with food.

Water-repellent coating

Marking of protective gloves, whose coating has been refined with a special water-repellent function.

DryGrip Membrane

Our special DryGrip Membrane is waterproof and breathable. The DryGrip Membrane is blocking and carefully preventing the ingress of liquids. Furthermore, perspiration is transported inside out. The DryGrip Membrane offers the user a high wearing comfort.

STANDARD 100 by OEKO-TEX®

STANDARD 100 by OEKO-TEX® is an independent testing and certification system for textile raw materials, intermediate and end products at all processing stages. The tests for harmful substances include substances forbidden by law, substances regulated by law, substances known to be harmful (but not yet legally regulated) and parameters for health care.

AQL

The AQL (Acceptable Quality Level) defines a precisely procedure at which a certain subset of a good is allocated for a sample. This sample is tested according to settled standards and specifications. From the received results, it is possible to draw conclusions about the quality of the goods. The higher the requirements for a product are, the more stricter are the predefined guidelines. The AQL is therefore a statistical method for determining the quality. Medical gloves must be aseptic and must comply with DIN EN 455. An AQL (Accepted Quality Level) of less than 0.65 or 1.5 is to be observed. The gloves are only tested for water resistance.

Premium quality

The quality of our products is our first priority and our whole product range is meeting our high standards. Products which have further premium features (e.g. due material selection, fitting, characteristics, finishing) are marked with this pictogram.

Touchscreen compatible

This pictogram marks products that are designed for working on touch-enabled surfaces. The touchscreen capability works best when no additional protective films (e.g. armored foil) are used on the surfaces.

Size range leather gloves

This pictogram indicates leather gloves that are available in several sizes.

Reflective elements

This pictogram indicates clothing that are equipped with reflective elements. Reflective elements are used for better visibility in poor visibility conditions.

NITRAS 3D FIT

Innovative fit with unique wearing comfort and higher protection for the user.

Dermatest®

The Dermatest seal is an award for independently tested products that are skin-friendly and safe.

SUSTAINABILITY TRAFFIC LIGHT

Packaging

Packaging used consists entirely or partially of recycled materials.

Social aspects

The production is amfori BSCI-audited (or according to a comparable standard) and thus contributes to the improvement of social standards or working conditions in the country of production.

Information according to EN ISO 21420:2020. This page must be printed or displayed in DIN A4 format, so that the correct size can be measured. The colours of the lines indicate the cuff colours of our protective gloves.

1 cm = 

Glove size	Hand circumference (mm)	Hand length (mm)
13	329	> 215
12	304	> 215
11	279	215
10	254	204
9	229	192
8	203	182
7	178	171
6	152	160
5	127	< 160
4	101	< 160

NITRAS Hand Chart

To find your correct size for NITRAS gloves:

1) Hand circumference

Measure your hand circumference at the widest point. The circumference in mm gives your corresponding glove size (see table below).

2) Hand length

Measure your hand length from the tip of the middle finger to the end of the ball of the thumb. The length in mm gives your corresponding glove size (see table below).

3) Hand Chart

Place your hand on the graphic and measure your appropriate size directly.

APPLICATION GUIDE

The application examples given on the following pages merely act as a rough overview in order to outline which hand / arm protection is suitable for which application. All hand / arm protections are partly suitable for other applications as well. Further subjective user preferences (e.g. material, breathability, type of coating, etc.) are not considered. This guide can not and should not replace personal advice. Furthermore the selection of the right hand / arm protection has always to be performed with regard to the risks at the workplace. For further information please do not hesitate to contact us.

BRANCH: Construction / mechanics / sanitary area

Demands (i. a.): high mechanical resistance, high abrasion, durability, high dexterity, where required liquid-tight with long cuff

Applications: industry, mechanical engineering, repair, gravel plant, quarry, craft, polymer processing, exhibition stand construction, metal working, waste processing, recycling, carpenter, road construction, scaffolder, stone processing, wood processing, sanitary area, waterworks, sewage plant, cleaning, agriculture, welding etc.

ADVANTAGE: Protection against minimal / medium risks

Protective gloves, which are marked with this pictogram are characterised by a robust design and protect the user from minimal and/or mechanical risks.

BRANCH: Chemistry / laboratory

Demands (i. a.): liquid-tight, preferably long cuff, protection from chemicals, highest dexterity, perfect fit

Applications: chemical industry, laboratory, cleaning, sanitary area, recycling, waste disposal, waste processing etc.

ADVANTAGE: Sensitive

Protective gloves, which are marked with this pictogram are characterised by a very high sensitivity and dexterity. Due to that they are perfect for working with small parts.

BRANCH: Landscape gardening

Demands (i. a.): perfect grip, protection against dirt and moisture, high dexterity

Applications: landscape gardening, agriculture, garden centre, craft, garden work etc.

ADVANTAGE: Non-slip / grippy

Protective gloves, which are marked with this pictogram are characterised by a very high slip resistance and a perfect grip on many surfaces.

BRANCH: Foodstuff

Demands (i. a.): highest dexterity, perfect fit, suitable for food contact

Applications: food processing, kitchens, canteens, food production, agriculture etc.

ADVANTAGE: Protection against heat and/or cold

Protective gloves, which are marked with this pictogram are characterised by protection against high and/or low temperatures and are therefore perfect for working under more difficult climatic conditions (welding, cold stores, in winter etc.).

BRANCH: Automotive manufacturing

Demands (i. a.): high dexterity, perfect grip, perfect fit, high or very high cut protection

Applications: automotive industry, supplier, ship building, tire trading, tire production, repair services, workshops, welding etc.

ADVANTAGE: Antistatic

Protective gloves, which are marked with this pictogram protect the user and sensitive parts from unintended and uncontrolled electrostatic discharges.

BRANCH: Commissioning / shipping

Demands (i. a.): highest dexterity, perfect grip, high breathability

Applications: shipping, logistics, transport, commissioning, sorting, etc.

ADVANTAGE: High / very high cut protection

Protective gloves, which are marked with this pictogram protect the user from high or very high risks by cutting injuries.

GUIDE: COATINGS AND MATERIALS

Gloves are available for a wide variety of applications (e.g. protection against cuts, heat, cold or chemicals). The materials and the coating play a major role in what protective gloves can be used for. In the following we summarise the basic advantages and properties of the most important coatings and materials.

ADVANTAGES / PROPERTIES / APPLICATIONS

LA	Latex Very good dry and wet grip, very flexible and stretchable, very elastic, very tear-resistant, very good tactile sensitivity, perfectly suited for workplaces that require very good grip (handling smooth and / or slippery objects or surfaces)
NI	Nitrile Resistant, robust, very good dry and oil grip, very high mechanical resistance, very high abrasion resistance, resistant to oils and greases, perfectly suited for workplaces with high demands on durable and abrasion-resistant protective gloves
PPU	PPU Very flexible, very good dry and wet grip, high mechanical resistance, durable and robust
PU	PU Good abrasion resistance, very sensitive, very good tactile sensitivity, perfectly suited for workplaces with high demands on the dexterity of the protective gloves
PVC	PVC Robust, high mechanical resistance, light and aging resistant, high abrasion resistance
SC	Special coating Very abrasion-resistant, breathable, very non-slip, very good dexterity, perfectly suited for workplaces with high demands on mechanical resistance and dexterity of the protective gloves

ADVANTAGES / PROPERTIES / APPLICATIONS

CH	Chloroprene Very elastic, flexible, resistant to oils and greases, resistant to acids, alkalis and solvents, perfectly suitable for workplaces with chemical contact
VI	Vinyl Soft, elastic, very sensitive, smooth surface
SL	Split leather Durable, robust, good grip, perfectly suited for workplaces with requirements for resistant protective gloves
GL	Grain leather Resistant, tear-proof, durable, robust, smooth surface, soft, sensitive, perfectly suited for workplaces with requirements for resistant protective gloves
AL	Artificial leather Robust, moisture-repellent, sensitive
UC	Uncoated Very flexible, very sensitive, high wearing comfort, very breathable, perfectly suitable as undergloves and for workplaces with minimal risks and very high demands on the dexterity of the protective gloves

SC

OUR 8700ESD3D - EXPERIENCE THIS UNIQUE FIT

Discover our new 8700ESD3D antistatic gloves with NITRAS 3D FIT fit and benefit from this innovation! Experience a unique wearing comfort and a higher protection for the user.

STANDARD

The fingers of the finished gloves have approximately the same beginnings to the palm. The little finger of the gloves is therefore always longer than the actual finger of the user.

THE INNOVATION – NITRAS 3D FIT

Thanks to NITRAS 3D FIT, the special position of the little finger is taken into account. This ensures a unique fit and the highest level of comfort. In addition, our 3D FIT thus offers increased protection for the user.

With our 8700ESD3D antistatic gloves you also benefit from the following advantages:

- ✓ Touchscreen compatible and dissipative
- ✓ Suitable and certified for household laundry (5 wash cycles)
- ✓ Paint compatibility tested
- ✓ Long service life and high performance - thus sustainable
- ✓ Skin compatibility tested - dermatest®

Experience these advantages first hand - talk to us!

CHEMICAL PROTECTIVE GLOVES

160435

Material: Cotton interlock, natural colour
Coating: PVC, red
Size(s): 10
Packaging unit: 60 pairs

NITRAS MERKUR, cow grain leather gloves, cotton back, natural colour, cow grain leather, grey (colour code: 1612), palm lining, rubberised cuff, double-stitched seams, leather selection B

IT IS IN OUR HANDS

Sustainability plays a major role for us. We want to set a good example and encourage ourselves every day anew to treat our earth's resources with care and sustainability. However, this commitment can not be achieved alone: we can only do it together. It is in our hands.

Further information on sustainability at NITRAS can be found on pages 6 and 7 and at <https://www.nitras-safety.com/en/company/sustainability/>.

CAN TOUCH THIS

Touchscreen-capable gloves are becoming increasingly important in today's working world due to advancing digitalisation. For greater efficiency and faster workflows, employees often use tablets, smartphones and other touchscreen devices. They use them to complete tasks, retrieve information or enter data.

Our touchscreen-capable protective gloves are therefore crucial for modern workplaces and make an important contribution to being able to organise workplace processes efficiently and without disruptions. We want to make it as easy as possible for you to find the right touchscreen protective gloves. Therefore, look out for the following pictogram:

It identifies all protective gloves designed for working with touch-enabled surfaces. Touch capability works best when no additional protective films (e.g. armour film) are used on the surfaces. Go to it!
